**Journal of Medical Discovery : Translate basic researches to clinical treatments**Editorial Office<sup>1,\*</sup><sup>1</sup>*Editorial office, Journal of Medical Discovery, Philadelphia, 19104, PA, United States*

On behalf of the editorial board team of the journal and the publication system E-Discovery Publication Incorporation, We are pleased to announce the launch of Journal of Medical Discovery (JMD), a new international journal with interests in medical research.

Journal of Medical Discovery (JMD) is an open access and peer-reviewed journal. It aims to be a high-profile platform for publishing outstanding research and review articles in all areas of medical researches, from basic, translational to clinical studies. Case reports, commentaries and other types of articles falling into the fields are also be considered for publication.

E-Discovery Publication Inc. (EDP), the publisher of JMD, is a publication group established in the United States. It publishes online papers only, with JMD as the first launched journal. All types of articles released by EDP are freely accessed online upon published early online. The published works are licensed under the Creative Commons Attribution License and allows articles to be distributed by the authors, as long as the works are correctly cited.

JMD provides a platform for exchanging information among researchers in the medical-scientific field and sub-specialties, including but not limited to biomedical science, cancer biology, pharmacology, nursing, biochemistry, molecular biology, stem cell, epigenetics, bioinformatics and

clinical researches. The journal publishes papers with broad readership, including but not limited to Basic life-Science Researchers, Oncologists and Oncology Specialists, Hematologists, Gynecologists, Urologists, Gastroenterologists, Endocrinologists, Pulmonologists, and Otolaryngologists, Dentists, Dermatologists, Ophthalmist, Radiologists, Anesthesiologists, Nurses, Epidemiologists, Pathologists, Disease Prevention Researchers and other medical specialists.

Why choosing medical researches as the subject area for our journal?

Diseases are impairing the living quality of millions of human beings and even leading to the death of plenty of patients. Various of diseases were discovered in the past years based on the contribution of basic and clinical researchers. However, most of the diseases are still hard to be treated. Cancer, cardiovascular diseases, neuron system diseases, diabetes and other kinds of diseases cost a lot of lives and economic expenses. As the clinical treatments are based on the clear mechanism of diseases, we are ought to combine these areas. We will publishes researches in basic, translational and clinical fields to make efforts in linking these works, finally leading to an improvement of therapeutic efficiency.

Why publish your valuable researches with JMD?

As a fast publication journal, JMD will provide authors with a transparent peer review process, fast editorial decision and accelerated publication rate of their work. To ensure the outstanding quality of JMD, we accept manuscripts with novel and sound scientific findings. The work should be performed scientifically, technically, ethically and in compliance with the standard guidelines. To attract the outstanding researches, all the manuscripts published on our journal are free of charge. All the published work can be freely accessed by researchers without any restrictions immediately.

JMD is supported by an international Editorial board team in various fields of basic and clinical researches (<http://www.e-discoverypublication.com/jmd-editorial-board/>). The submitted manuscripts will be professionally evaluated by the editors and reviewers. Together with the authors and the reviewers, the editorial board team will try their best to dramatically improve the quality of the accepted researches.

We thank all the editors and reviewers for their contribution in evaluating and improving the quality of the manuscripts. We appreciate the authors for their submission of their valuable work to our journal. We will work together to get the journal indexed in various systems and increase the impact of the published works on our journal.
